1 Let's differentiate this statement

sin(x)

It's not hard to notice, that if we differentiate:

$$\sin(x)$$

(1)

Now, let's differentiate: x

Answer is for the intermediate step: 1

We will get:

$$x$$

$$\cos(x)$$

(3)

$$-1.000000$$

(3)

Let's simplyfy this statement:

$$x$$

$$\cos(x)$$

(5)

$$-1.000000$$

(5)

Answer is for the intermediate step:

$$\cos(x)$$

(6)

2 So, answer is

(6)

:

$$\cos(x)$$

(7)
